

Sachin Saxena

Product Manager | Mobile & AI Products

sssaxena058@gmail.com | +91 7526007604 | Gurugram, India (Open to Delhi NCR) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Product-focused professional with ~4 years driving requirement gathering, feature prioritization, and cross-functional delivery for AI, gaming, IoT, and healthcare mobile products. Track record of turning user feedback and technical constraints into prioritized roadmaps, working directly with engineering, QA, design, and clients to ship on schedule. Ships own AI products end-to-end (OutLoud) and publish product management content to a 100K-subscriber YouTube channel. Strong stakeholder communication and a track record of translating technical complexity for non-technical audiences.

CORE SKILLS

Product: Requirement Gathering, Feature Prioritization, Roadmap Planning, Agile/Sprint Execution, Release Planning, Stakeholder Management, Cross-functional Collaboration, PRD & Product Documentation, User Feedback Analysis, Product Analytics

EXPERIENCE

IF MedTech Pvt Ltd.Sep 2025 – Present

*Mobile Lead, Product & Engineering*Navi Mumbai

- Owned requirement-to-release coordination for two AI healthcare products (Dr. Skin AI, Oravue AI), translating client and user needs into prioritized sprint scope across engineering, QA, and design
- Redesigned the Dr. Skin AI dashboard experience based on direct user feedback, prioritizing usability changes over technical convenience to improve day-to-day product adoption
- Authored release and compliance documentation ahead of Play Store submission, cutting review cycles between engineering and compliance
- Acted as primary point of contact between client and delivery teams, resolving requirement ambiguity before it could block sprint execution

TetraFolia Skills Games Pvt LtdJun 2025 – Aug 2025

*Software Engineer, SDE (Full Time)*Gurugram

- Partnered directly with product and backend to prioritize and ship user-facing features under startup constraints, balancing speed with quality
- Integrated CleverTap and Adjust analytics to give the product team visibility into user behavior, enabling data-informed feature decisions
- Coordinated releases and API integrations across teams to protect delivery timelines

Global Grand Gaming Pvt LtdJan 2025 – May 2025

*Software Engineer, SDE (Full Time)*Bangalore

- Owned analytics instrumentation and payment integration (Cashfree) that supported scaling a gaming app to 100K+ downloads and enabled monetization
- Mentored and onboarded junior interns onto third-party API workflows, shortening ramp-up time
- Implemented Firebase analytics and authentication to support user growth and retention tracking

Project: [Grand Gaming \(Google Play\)](#)

Shunya Ekai TechnologiesDec 2022 – Dec 2024

*Android Developer (Full Time)*Gurugram

- Contributed to the 0→1 launch of an EV ecosystem app for drivers and consumers, shaping architecture, payments, and Maps-based workflows from concept through release
- Led migration of a legacy IoT (MQTT) application to Kotlin, improving maintainability and reducing time-to-ship for future features

Project: [PlusX Electric \(Google Play\)](#)

Inventia Technology Consultants Pvt Ltd Apr 2022 – Jul 2022

Android Trainee (Internship) Noida

- Built foundational Android development experience implementing UI changes across two production platforms

EDUCATION

Airtribe 2025

AI Product Management Certification (16-Week Cohort)

Bundelkhand University 2020 – 2022

Master of Computer Application (MCA) Jhansi, Uttar Pradesh

DBRAU (Agra University) 2016 – 2019

B.Sc, Computer Science Uttar Pradesh

PROJECTS

Product Case Studies & PRDs

- Independently authored PRDs and product teardowns applying prioritization, funnel, and growth frameworks to real consumer products — including a retention funnel analysis for Zomato, an AOV growth case study for Zepto, a PLG teardown for Airbnb, and a PRD for a B2B SaaS corporate learning platform

Full case studies: sachin-saxena.notion.site/Portfolio

OutLoud — AI English Speaking Coach

- Designed and shipped a voice-first AI coaching product solo: 3 spoken questions, one AI interviewer, one honest scorecard — built for people who read and write English well but freeze when speaking it
- Made the core AI product trade-offs: on-device speech-to-text for zero-latency transcription, Gemini for interview logic with a local question-bank fallback if the API fails, and Sarvam's Bulbul v3 for natural-sounding voice
- Designed privacy-first by default — audio is transcribed on-device and never uploaded; only answer text is sent to the model
- Instrumented product analytics (session starts, completions, skip rate) to guide iteration

Live product: out-loud-mu.vercel.app

Source: github.com/ytsaxena/OutLoud

Suraksha App (Safety Solution)

- Owned the full 0→1 product lifecycle — concept, planning, execution — shipping to the Play Store within a 2-month timeline
- Ran sprint planning in ClickUp and mentored 2 developers through architecture decisions, code review, and testing

Project: [Suraksha – Safety & SOS \(Google Play\)](#)

OTHER

Technical Fluency: Kotlin, Java, REST APIs, Android (Jetpack Compose, XML), Flutter, Firebase, Google Maps, GitHub, Google Play Console

Analytics & Tools: CleverTap, Adjust, Firebase Analytics, Google Analytics, Jira, ClickUp, Figma, Canva

AI Tools: Claude (Code), Gemini API, Sarvam AI, n8n, Google AI Studio, Loveable, ChatGPT

Leadership & Community: Publish product management content — PM interview prep, career roadmaps, and AI/automation tutorials (n8n workflows for PMs) — to a 100K-subscriber YouTube channel and 11K+ LinkedIn followers; mentored 5,000+ developers and students through workshops and technical sessions; featured contributor on Google's official YouTube Help channel (YouTube Video Contributor Program); speaker at Kotlin User Group Delhi, GL Bajaj, Galgotias University, and Bundelkhand University
